

SafeWay shares an understanding with our customers that success springs from quality products.

Our partnerships with customers are built around precision machining, injection molding, metal stamping and wire EDM. Being a vertically integrated manufacturer, we excel at adapting our existing design concepts to customized applications.

- Technical support
- Engineering support
- Product design support
- Full CAD/CAM capabilities
- Prototype machining
- Rapid Prototype modeling
- Lean manufacturing
- PPAP/ISIR quality assurance

Technical support from our experienced Customer Service Department, Sales Managers, and Engineers provide a team effort to support your needs. One phone call connects you the customer to timely, accurate updates and answers to questions about specifications, production, delivery, quality, pricing and more.

From a technology standpoint, SafeWay uses a variety of inspection equipment customized to meet the needs of our customers. We support quality assurance processes including PPAP/ISIR and conduct continuous in-process quality verification.

Our assembly operations are guided by demand-driven manufacturing that synchronizes customer orders with production scheduling and fabrication. The production floor is model of lean, high-performance cellular manufacturing. Cross-functional teams ensure that parts flow seamlessly into assembly, warehousing and shipping. SafeWay constantly implements process flow refinements to maximize efficiency in even the most complicated assembly processes.

ISO 9001: 2015 Certification

SafeWay and its quality management system consistently enhance customer satisfaction by providing products that meet or exceed customer and regulatory requirements. [Download a Copy of Our ISO 9001:2015 Certificate](#)
